I am... failing my major and need to find another path.

1. Make an appointment with the Retention Office
   The Retention Office staff will help you evaluate all areas that may be contributing to your situation, and they will help you formulate a plan of action that leads toward success.

2. Meet with your Academic Advisor
   Your Academic Advisor will make sure you know how to change your major and what forms need to be completed.

3. Make an appointment with Career Services
   A career counselor will talk with you about external and internal factors that get in the way of choosing a major/career path. Career Services will help you select assessments to help you purposefully evaluate how your interests, skills, values and personality align with various majors and career paths.

4. Research majors & careers of interest
   Explore the Occupational Outlook Handbook and What Can I do with a Major in…?. Review the list of available majors and minors at MSU (review course requirements) and review RACR Audit.

5. Meet with your NEW Academic Advisor & Create Plan
   Establish a positive relationship with your new advisor and develop a plan for moving forward with a new major successfully.
